PROFESSIONAL SUMMARY

IT support professional with military experience and hands-on training in software development, system troubleshooting, and data operations. Skilled in diagnosing technical issues, supporting users, and maintaining secure systems in high-responsibility environments. Experience with JavaScript, GitHub workflows, and debugging through real-world coding labs. Known for strong problem-solving, adaptability, and attention to detail.

TECHNICAL SKILLS

IT & SYSTEMS

- System troubleshooting and issue resolution
- Hardware diagnostics and computer maintenance
- Windows & Linux (Ubuntu) environments
- Command line navigation and system operations

NETWORKING

- VLANs, IPv4/IPv6
- OSPF, EIGRP, RIPv2
- ACL configuration
- Network segmentation and device hardening

DATA & OPERATIONS

- Data tracking and reporting (Excel-based systems)
- Information management and documentation
- Data validation and accuracy control
- Secure handling of sensitive information

SOFTWARE & TOOLS

- Git & GitHub (repositories, commits, push/pull)
- VS Code
- Microsoft Excel (advanced)
- Chrome DevTools

PROGRAMMING

- JavaScript (functions, conditionals, debugging)
- HTML basics and web structure
- Error tracing and problem-solving

PROJECTS

JavaScript Event Logging System

- Developed functions to log and manage event data
- Implemented reusable logic and structured coding practices
- Strengthened debugging and problem-solving skills

Web Page Development Project

- Built structured web pages using HTML
- Integrated external media and resolved rendering issues
- Debugged file paths and broken links

Debugging & Error Resolution Lab

- Identified and corrected syntax and logic errors in JavaScript
- Applied step-by-step debugging strategies
- Improved troubleshooting efficiency

GitHub Version Control Workflow

- Cloned repositories and managed local environments
 - Committed and pushed updates using Git
 - Applied version control best practices
-

EXPERIENCE

Data Operations Specialist (Part-Time)

Alaska Air National Guard – Anchorage, AK

June 2025 – Present

- Manage and coordinate operational data and information systems
 - Analyze data to support mission and decision-making processes
 - Assist with communication system planning and integration
 - Provide user support for data tools and services
 - Evaluate operational plans for impact on resources and systems
-

Security Escort

Andrews Air Force Base, MD

October 2024 – Present

- Escort contractors in secure environments while enforcing protocols
- Monitor work progress and ensure compliance with operational standards

- Process access authorization documentation
 - Coordinate with teams to support daily operations
-

Security Assistant

Andrews Air Force Base, MD

June 2022 – September 2024

- Built and maintained Excel tracking systems for accountability and readiness
 - Managed sensitive information with strict security compliance
 - Supported leadership with documentation and administrative operations
 - Monitored personnel readiness and compliance metrics
-

Armament Systems Technician (Part-Time)

Andrews Air Force Base, MD

December 2018 – June 2025

- Troubleshoot mechanical and electronic systems on F-16 aircraft
 - Performed diagnostics and maintenance on mission-critical systems
 - Conducted inspections to ensure operational readiness
 - Collaborated with teams to meet safety and compliance standards
-

EDUCATION

Flatiron School

Software Engineering Program (In Progress)

University of Maryland Global Campus

Relevant Coursework: Networking & Cybersecurity

Northern High School — Owings, MD

Diploma, June 2018

Career & Technology Academy — Prince Frederick, MD

Advanced Networking & Cybersecurity Track

HONORS & ACHIEVEMENTS

- Advanced Networking Program Completion
- Dual Completer: College Prep & Technical Pathways
- Honors in STEM coursework
